saydroid

OPEN SOURCE VOICE DICTATION

Speak. It types. You keep it.

saydroid is open source voice dictation. You bring your own AI keys. There is no account.

You own 100% of your data.

Your own AI keys

Transcription and cleanup run on the models you choose.

No login

No account to create, and nothing to sign in to.

Nothing in the cloud

saydroid does not keep a copy of what you say or write.

HOW IT WORKS

1. Tap the bubble.
2. Speak.
3. Tap again. The text lands in the field you were using.

Audio is deleted after transcription. History stays on the phone.

Open source · Android
